

### THE CHALLENGE

Buildings account for **37%** of the County's

ENERGY USE & CLIMATE POLLUTION

BUILDINGS WASTE an average of **30%** of their energy and water due to inefficiencies and poor operation

### THE GOALS

Reduce operating costs for property owners through building efficiency

Expand access to financing tools for efficiency improvements

Assist our most vulnerable neighbors by reducing utility cost burdens

Improve building efficiency through building code training and education

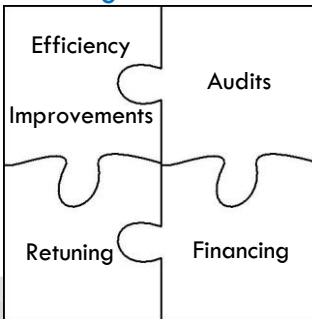

Increase awareness of building efficiency and data-driven decision making

Reduce water supply constraints and preserve a critical natural resource

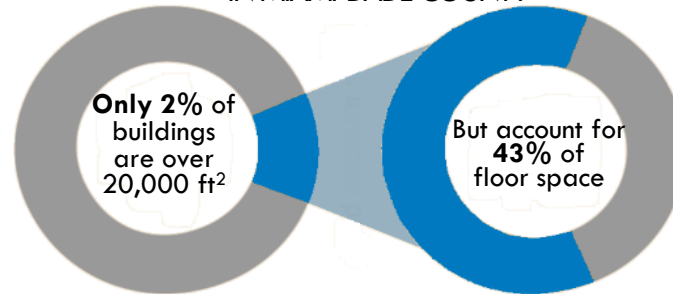

### THE METHOD

Strategies to Improve Building Performance

Benchmarking & Transparency

LARGE BUILDINGS REPRESENT THE GREATEST OPPORTUNITY FOR SAVINGS IN MIAMI-DADE COUNTY

### THE POTENTIAL

ANNUALLY:

Enough energy savings to power

**79,990** homes

OR

Equivalent to taking

**141,000** cars off the road
